

INFORMATION SECURITY POLICY WHITE RESEARCH

White Research is a consulting company that blends hands-on experience with advanced insights from consumer behaviour, marketing research and analytics and innovation management to improve the strategy, policy and stakeholder engagement needs of its institutional and private clients.

Top management commits to:

- fulfil the applicable requirements of all interested parties (e.g. legal and regulatory, contractual) related to information security;
- set information security objectives that are consistent with this policy, measurable and to monitor and update them as appropriate;
- take all necessary actions to achieve the continual improvement of the information security management system;
- update, whenever seems appropriate, the present policy, in order to ensure its sufficiency and suitability,
- provide the employees with the required training and working environment for the successful execution of their information security related tasks,
- provide the necessary resources for the information security management system.
- consider and apply the provisions of EU's General Data Protection Regulation (GDPR) in cases where personal data are collected and processed,
- comply with the requirements arising from the legislative and regulatory framework for the protection of privacy and personal data.
